

Quick Note of Appreciation

We want to remind everyone that we are all navigating this pandemic together, we are all human, and we all have people we love and worry about. We are all on your side and want all our patients to have quick access to the COVID-19 vaccine and any other life-saving options that exist now or will exist in the future. We continue to take all the necessary steps to make that happen quickly, safely, and efficiently.

As we approach the end of the second year of this pandemic, we are aware that many of our patients, staff, friends, family, and community members may be feeling particularly discouraged or frustrated. So, we wanted to take a moment to share that we appreciate all of the patience, kindness, and understanding shown for our providers and staff, other patients and community members through this exceedingly difficult time. We are SO fortunate to have the opportunity to care for so many incredible patients, and we are endlessly grateful that our staff has volunteered to work extra hours to make sure our patients are protected.

There is a light at the end of the tunnel, and, with your help, we can make it there together!
